N/A Not applicable.

Less than three reporting handlers. Product pounds and butterfat were combined with Miscellaneous Class II products.

Pursuant to Sec. 1002.41(d)(3)(4)(6)—animal feed, dumpage, and extraordinary loss.

Sales Survey—November 1997

TABLES

Data

The data in the tables represent sales of packaged fluid milk products on routes inside the New York–New Jersey milk marketing area (Order No. 2). The information was obtained from container survey reports filed by handlers.

Qualified Use of Data

If information for a specific size of a specific product was obtained from fewer than three handlers, that amount was not included in the compilation. Similarly, if a specific size of a specific product yielded a total of less than 500 pounds, it was not included. The route sales that were excluded amounted to less than one-tenth of one percent of all sales.

TERMINOLOGY

Packaged Sales

The packaged fluid milk products sold on routes inside the marketing area consist of whole milk products and lowfat milk products. The whole milk products are plain milk and flavored milk. The lowfat milk products are: low test milk—1% and 2% butterfat content; skim milk; flavored milk drinks; and buttermilk.

Method of Distribution

Sales are classified as wholesale or home-delivered. Wholesale are those made to restaurants, schools, hospitals, supermarkets, grocery stores, military institutions, etc.

Type of Container

The three categories are glass, paper, and plastic. Plastic includes cans, tins, and bag-in-box containers.

Handler

A handler participating in the survey is one who (a) engages in the processing of fluid milk products and (b) has sales of packaged products on routes in the marketing area.

Regulated Handler and Plant

A regulated handler is one who operates a plant(s) under the provisions of Federal Order No. 2.

Producer-handler

A producer-handler is one who completely controls the production, processing, and distribution of the milk that he handles pursuant to the provisions of Order No. 2. According to these provisions, he may handle only a nominal amount of milk he does not produce.

Other Federal Order Handler and Plant

A handler regulated under another federal order is one who operates a plant(s) under the provisions of that order. Exception: If he has qualified as a regulated handler, only the plant is other order.

Non-regulated Handler and Plant

A non-regulated handler is one who operates a plant(s) that is not under the provisions of any federal order. Exception: If qualified as a regulated or other order handler, only the plant is non-regulated.

Subdealer

A subdealer is a handler who (a) does not own, operate, or lease a plant and (b) does not pasteurize or bottle milk but (c) does purchase packaged products from another handler for distribution according to the methods previously set forth. This term does not include a store.

Market Share

The market share is the percentage of sales that an individual handler or grouping of handlers has relative to all sales in the marketing area.

**Table 1. Number of Handlers and Plants With Packaged Sales
Inside the New York–New Jersey Milk Marketing Area**

Month of November	Regulated			Other*		Total
