

## NORTHEAST ORDER UNIFORM PRICE FOR JANUARY 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for January 2001 is \$13.76 per hundredweight (\$1.18 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The January statistical uniform price is \$13.66 for delivery to plants in New York, NY, and \$13.56 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for January is \$3.77 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in January are as follows: Class I, \$17.24 (Suffolk County, MA); Class II, \$12.82; Class III, \$9.99; and Class IV, \$12.13. Comparable class prices for January 2000 were: Class I \$14.15, Class II \$11.43, Class III \$10.05, and Class IV price \$10.73. The component values for January are protein, \$1.6181 per pound; butterfat, \$1.2896 per pound; other solids, \$0.1120 per pound; and nonfat solids, \$0.8765 per pound.

Milk receipts from producers totaled 2.051 billion pounds. Class I utilization, milk processed as beverage milk, was 43.3 percent of producer milk receipts. The average Class I utilization was 42.2 percent in January 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 16.5 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 30.6 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 9.6 percent of the total.

\* Additional statistical uniform price and PPD information by selected location on reverse side.

## NORTHEAST ORDER UNIFORM PRICE FOR FEBRUARY 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for February 2001 is \$13.62 per hundredweight (\$1.17 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The February statistical uniform price is \$13.52 for delivery to plants in New York, NY, and \$13.42 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for February is \$3.35 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in February are as follows: Class I, \$15.19 (Suffolk County, MA); Class II, \$13.43; Class III, \$10.27; and Class IV, \$12.70. Comparable prices for February 2000 were: Class I \$13.96, Class II \$11.51, Class III \$9.54, and Class IV price \$10.80. The component values for February are protein, \$1.4951 per pound; butterfat, \$1.4626 per pound; other solids, \$0.1199 per pound; and nonfat solids, \$0.8737 per pound.

Milk receipts from producers totaled 1.898 billion pounds. Class I utilization, milk processed as beverage milk, was 43.3 percent of producer milk receipts. The average Class I utilization was 41.3 percent in February 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 16.1 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 31.3 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 9.3 percent of the total.

## NORTHEAST ORDER UNIFORM PRICE FOR MARCH 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for March 2001 is \$14.50 per hundredweight (\$1.25 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The March statistical uniform price is \$14.40 for delivery to plants in New York, NY, and \$14.30 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for March is \$3.08 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in March are as follows: Class I, \$15.90 (Suffolk County, MA); Class II, \$14.17; Class III, \$11.42; and Class IV, \$13.46. Comparable prices for March 2000 were: Class I \$14.09, Class II \$11.71, Class III \$9.54, and Class IV price \$11.00. The component values for March are protein, \$1.6498 per pound; butterfat, \$1.6820 per pound; other solids, \$0.1039 per pound; and nonfat solids, \$0.8727 per pound.

Milk receipts from producers totaled 2.157 billion pounds. Class I utilization, milk processed as beverage milk, was 44.2 percent of producer milk receipts. The average Class I utilization was 42.0 percent in March 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 16.6 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 31.4 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 7.8 percent of the total.

## NORTHEAST ORDER UNIFORM PRICE FOR APRIL 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for April 2001 is \$15.24 per hundredweight (\$1.31 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The April statistical uniform price is \$15.14 for delivery to plants in New York, NY, and \$15.04 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for April is \$3.18 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in April are as follows: Class I, \$16.69 (Suffolk County, MA); Class II, \$15.10; Class III, \$12.06; and Class IV, \$14.41. Comparable prices for April 2000 were: Class I \$14.18, Class II \$12.10, Class III \$9.41, and Class IV price \$11.38. The component values for April are protein, \$1.5443 per pound; butterfat, \$1.9483 per pound; other solids, \$0.1081 per pound; and nonfat solids, \$0.8745 per pound.

Milk receipts from producers totaled 2.048 billion pounds. Class I utilization, milk processed as beverage milk, was 41.2 percent of producer milk receipts. The Class I utilization was 39.0 percent in April 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 15.5 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 33.5 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 9.8 percent of the total.

\* Additional statistical uniform price and PPD information by selected location on reverse side.

## NORTHEAST ORDER UNIFORM PRICE FOR MAY 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for May 2001 is \$16.32 per hundredweight (\$1.40 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The May statistical uniform price is \$16.22 for delivery to plants in New York, NY, and \$16.12 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for May is \$2.49 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in May are as follows: Class I, \$17.46 (Suffolk County, MA); Class II, \$15.72; Class III, \$13.83; and Class IV, \$15.04. Comparable prices for May 2000 were: Class I \$14.73, Class II \$12.63, Class III \$9.37, and Class IV price \$11.91. The component values for May are protein, \$1.9108 per pound; butterfat, \$2.1191 per pound; other solids, \$0.1229 per pound; and nonfat solids, \$0.8780 per pound.

Milk receipts from producers totaled 2.196 billion pounds. Class I utilization, milk processed as beverage milk, was 41.1 percent of producer milk receipts. The average Class I utilization was 41.0 percent in May 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 14.9 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 33.5 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 10.5 percent of the total.

\* Additional statistical uniform price and PPD information by selected location on reverse side.

## NORTHEAST ORDER UNIFORM PRICE FOR JUNE 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for June 2001 is \$17.08 per hundredweight (\$1.47 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The June statistical uniform price is \$16.98 for delivery to plants in New York, NY, and \$16.88 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for June is \$2.06 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in June are as follows: Class I, \$18.24 (Suffolk County, MA); Class II, \$16.05; Class III, \$15.02; and Class IV, \$15.33. Comparable prices for June 2000 were: Class I \$14.95, Class II \$13.08, Class III \$9.46, and Class IV price \$12.38. The component values for June are protein, \$2.1670 per pound; butterfat, \$2.2089 per pound; other solids, \$0.1409 per pound; and nonfat solids, \$0.8748 per pound.

Milk receipts from producers totaled 2.067 billion pounds. Class I utilization, milk processed as beverage milk, was 40.7 percent of producer milk receipts. The average Class I utilization was 42.1 percent in June 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 15.6 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 34.0 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 9.7 percent of the total.

## NORTHEAST ORDER UNIFORM PRICE FOR JULY 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for July 2001 is \$17.21 per hundredweight (\$1.48 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The July statistical uniform price is \$17.11 for delivery to plants in New York, NY, and \$17.01 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for July is \$1.75 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in July are as follows: Class I, \$18.59 (Suffolk County, MA); Class II, \$15.96; Class III, \$15.46; and Class IV, \$14.81. Comparable prices for July 2000 were: Class I \$15.71, Class II \$12.58, Class III \$10.66, and Class IV price \$11.87. The component values for July 2001 are protein, \$2.3175 per pound; butterfat, \$2.1883 per pound; other solids, \$0.1510 per pound; and nonfat solids, \$0.8234 per pound.

Milk receipts from producers totaled 2.125 billion pounds. Class I utilization, milk processed as beverage milk, was 39.3 percent of producer milk receipts. The average Class I utilization was 40.5 percent in July 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 17.3 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 33.1 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 10.3 percent of the total.

## NORTHEAST ORDER UNIFORM PRICE FOR AUGUST 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for August 2001 is \$17.53 per hundredweight (\$1.51 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The August statistical uniform price is \$17.43 for delivery to plants in New York, NY, and \$17.33 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for August is \$1.98 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in August are as follows: Class I, \$18.65 (Suffolk County, MA); Class II, \$15.98; Class III, \$15.55; and Class IV, \$15.06. Comparable prices for August 2000 were: Class I \$15.20, Class II \$12.56, Class III \$10.13, and Class IV price \$11.87. The component values for August are protein, \$2.2188 per pound; butterfat, \$2.2976 per pound; other solids, \$0.1535 per pound; and nonfat solids, \$0.8073 per pound.

Milk receipts from producers totaled 2.037 billion pounds. Class I utilization, milk processed as beverage milk, was 43.7 percent of producer milk receipts. The average Class I utilization was 45.2 percent in August 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 19.7 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 31.6 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 5.0 percent of the total.

## NORTHEAST ORDER UNIFORM PRICE FOR SEPTEMBER 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for September 2001 is \$17.76 per hundredweight (\$1.53 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The September statistical uniform price is \$17.66 for delivery to plants in New York, NY, and \$17.56 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for September is \$1.86 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in August are as follows: Class I, \$18.81 (Suffolk County, MA); Class II, \$16.24; Class III, \$15.90; and Class IV, \$15.59. Comparable prices for September 2000 were: Class I \$15.09, Class II \$12.58, Class III \$10.76, and Class IV price \$11.94. The component values for September are protein, \$2.1647 per pound; butterfat, \$2.4449 per pound; other solids, \$0.1520 per pound; and nonfat solids, \$0.8097 per pound.

Milk receipts from producers totaled 1.976 billion pounds. Class I utilization, milk processed as beverage milk, was 44.6 percent of producer milk receipts. The average Class I utilization was 49.3 percent in September 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 18.0 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 30.2 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 7.2 percent of the total.

## NORTHEAST ORDER UNIFORM PRICE FOR OCTOBER 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for October 2001 is \$16.04 per hundredweight (\$1.38 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The October statistical uniform price is \$15.94 for delivery to plants in New York, NY, and \$15.84 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for October is \$1.44 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in October are as follows: Class I, \$19.18 (Suffolk County, MA); Class II, \$13.53; Class III, \$14.60; and Class IV, \$12.77. Comparable prices for October 2000 were: Class I \$15.14, Class II \$12.54, Class III \$10.02, and Class IV price \$11.81. The component values for October are protein, \$2.6664 per pound; butterfat, \$1.6526 per pound; other solids, \$0.1482 per pound; and nonfat solids, \$0.8041 per pound.

Milk receipts from producers totaled 1.988 billion pounds. Class I utilization, milk processed as beverage milk, was 47.8 percent of producer milk receipts. The average Class I utilization was 48.5 percent in October 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 17.7 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 27.7 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 6.8 percent of the total.

FOR IMMEDIATE RELEASE

December 13, 2001

## NORTHEAST ORDER UNIFORM PRICE FOR NOVEMBER 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for November 2001 is \$15.28 per hundredweight (\$1.31 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The November statistical uniform price is \$15.18 for delivery to plants in New York, NY, and \$15.08 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for November is \$3.97 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in November are as follows: Class I, \$19.01 (Suffolk County, MA); Class II, \$12.78; Class III, \$11.31; and Class IV, \$11.97. Comparable prices for November 2000 were: Class I \$15.07, Class II \$13.68, Class III \$8.57, and Class IV price \$13.00. The component values for November are protein, \$1.8045 per pound; butterfat, \$1.4500 per pound; other solids, \$0.1470 per pound; and nonfat solids, \$0.7949 per pound.

Milk receipts from producers totaled 1.937 billion pounds. Class I utilization, milk processed as beverage milk, was 47.8 percent of producer milk receipts. The average Class I utilization was 49.2 percent in November 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 17.4 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 28.6 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 6.2 percent of the total.

\* Additional statistical uniform price and PPD information by selected location on reverse side.

## NORTHEAST ORDER UNIFORM PRICE FOR DECEMBER 2001

-- --

Erik F. Rasmussen, Market Administrator for the Northeast Marketing Area, has announced that the statistical uniform price paid by milk dealers (handlers) regulated under the Northeast Order for December 2001 is \$13.72 per hundredweight (\$1.18 per gallon) for milk delivered to plants located in Suffolk County, MA (Boston). The December statistical uniform price is \$13.62 for delivery to plants in New York, NY, and \$13.52 for delivery to plants in Philadelphia, PA. The statistical uniform price is the benchmark minimum producer blend price paid to dairy farmers, prior to allowable deductions, for milk containing 3.5 percent butterfat, 2.99 percent protein, and 5.69 percent other solids. The price received by an individual dairy farmer will vary as the component composition of a farm's milk differs from the established benchmarks and by the location of the plant(s) to which the farm's milk is delivered.

Mr. Rasmussen also stated that the producer price differential (PPD) for December is \$1.92 per hundredweight for milk delivered to plants located in Suffolk County, MA. The PPD represents each producer's share of the value generated by the marketwide pool on a hundredweight basis. The PPD, which is added to the payment producers receive for their milk's components, is adjusted for the location of the receiving plant. The statistical uniform price and PPD decrease by scheduled amounts the more distant the plant receiving producer milk is from Suffolk County, MA. \*

The Class prices for milk pooled in December are as follows: Class I, \$15.23 (Suffolk County, MA); Class II, \$12.61; Class III, \$11.80; and Class IV, \$11.79. Comparable prices for December 2000 were: Class I \$15.38, Class II \$13.97, Class III \$9.37, and Class IV price \$13.27. The component values for December are protein, \$1.9782 per pound; butterfat, \$1.4322 per pound; other solids, \$0.1517 per pound; and nonfat solids, \$0.7799 per pound.

Milk receipts from producers totaled 2.078 billion pounds. Class I utilization, milk processed as beverage milk, was 43.8 percent of producer milk receipts. The average Class I utilization was 47.9 percent in December 2000.

The manufacture of Class II products such as cream, ice cream, yogurt, and cottage cheese utilized 15.3 percent of producer milk. Milk used to manufacture Class III products such as cheese (American and Italian) and evaporated and condensed products utilized 29.3 percent of total milk receipts. Class IV usage (butter, nonfat and whole milk powder) equaled 11.6 percent of the total.
