## Summary

This bulletin provides information about the operation of the Northeast Order during 2015 through a series of tables and charts. The *Bulletin Highlights* section summarizes important events that impacted the dairy industry in 2015. Also included are lists of handlers and cooperatives operating under the Order with their respective locations depicted on a map of the region.

### **Producer Milk Volume Sets Another Record**

During 2015, the volume of milk received from producers shipping to handlers regulated under the Northeast Order increased for the sixth straight year and set a new record high since the Order's inception in 2000. This is the third year in a row that total pooled volume has set a new record and the first time the annual total volume has exceeded 26 billion pounds.

The year ended with 514 less producers than at the end of 2014. Annual average daily deliveries per producer (DDP) equaled 6,071 pounds, an increase of 4.4 percent from 2014 and the first time the annual average was over 6,000 pounds. Unlike 2014, when the uniform price also was a record-high for the Order, the 2015 annual average uniform price was the lowest in 5 years.

### **Class Utilization Changes**

Class I utilization averaged 34.7 percent in 2015, a decrease of 0.7 percentage points from the previous year. The total volume of milk used in Class I continued its decline, but at a slower rate than in 2014 (down 2.0 percent versus 3.8 percent in 2014). This was the smallest Class I volume ever for the Order and the first time since the Order's inception that the annual total was below 9 billion pounds. Class II usage increased 1.2 percent, resulting in overall utilization of 24.5 percent, up from 24.2 percent in 2014.

Class III volume dropped 6.6 percent with utilization averaging 24.1 percent, down 1.7 percentage points. The amount of milk used in Class IV jumped again in 2015 (up 21 percent) and accounted for an annual average of 17.7 percent utilization, up 3.1 percentage points. The total volume used in Class IV set a new record high for the Order and topped 4 billion pounds for the first time ever. Strong milk production during 2015, combined with less use in Class I and III and the slowing of utilization in Class II, resulted in significant increases in milk used in Class IV nonfat dry milk.

### **Lower Class and Component Prices**

After witnessing record-setting prices in 2014 for all commodities used in calculating minimum federal order prices, 2015 experienced some of the lowest prices seen in five years on the National Dairy Products Sales Report (NDPSR). Only butter prices held during most of the year and actually set new record highs for the last three months of 2015. The NDPSR prices follow the Chicago Mercantile Exchange (CME) prices where the butter price reached a new peak in late September at \$3.1350 per pound. Overall, the NDPSR butter price was the second highest ever reported at \$2.0670 per pound (record high was in 2014 at \$2.1361). Cheese prices began dropping late 2014 and continued declining, with a slight upturn in the summer months, and ended the year at \$1.6454, down nearly 24 percent from 2014. Prices for nonfat dry milk and dry whey fell 49 and 42 percent, respectively from 2014 as reported by the NDPSR.

Lower commodity prices translated into lower component prices, lower class prices, and ultimately, lower statistical uniform prices. The price paid to producers for butterfat averaged \$2.2954 per pound, down 3.5 percent from 2014, but was still the second highest reported since the Order's inception in 2000. The per-pound annual average protein price was \$2.2393 per pound, the lowest in 6 years, and a decline of 41 percent from 2014. The other solids price dropped 60 percent and averaged \$0.1867 per pound, the lowest in 5 years. The nonfat solids price averaged \$0.7265 per pound, down 54 percent and the lowest in 11 years.

The Class I price averaged \$19.59 per hundredweight in 2015, \$6.95 (26 percent) below the 2014 annual average. The Class II price averaged \$15.48 per hundredweight, down \$7.86 and 34 percent higher than the previous year. The Class III price averaged \$15.80, down \$6.54 and 29 percent from 2014. The Class IV price dropped \$7.74 to \$14.35, a decrease of 35 percent. Overall, the statistical uniform price (blend) reported at Suffolk County, Massachusetts (Boston) averaged \$17.14 per hundredweight, the lowest price since 2010, \$7.14 and 29 percent below the 2014 average.

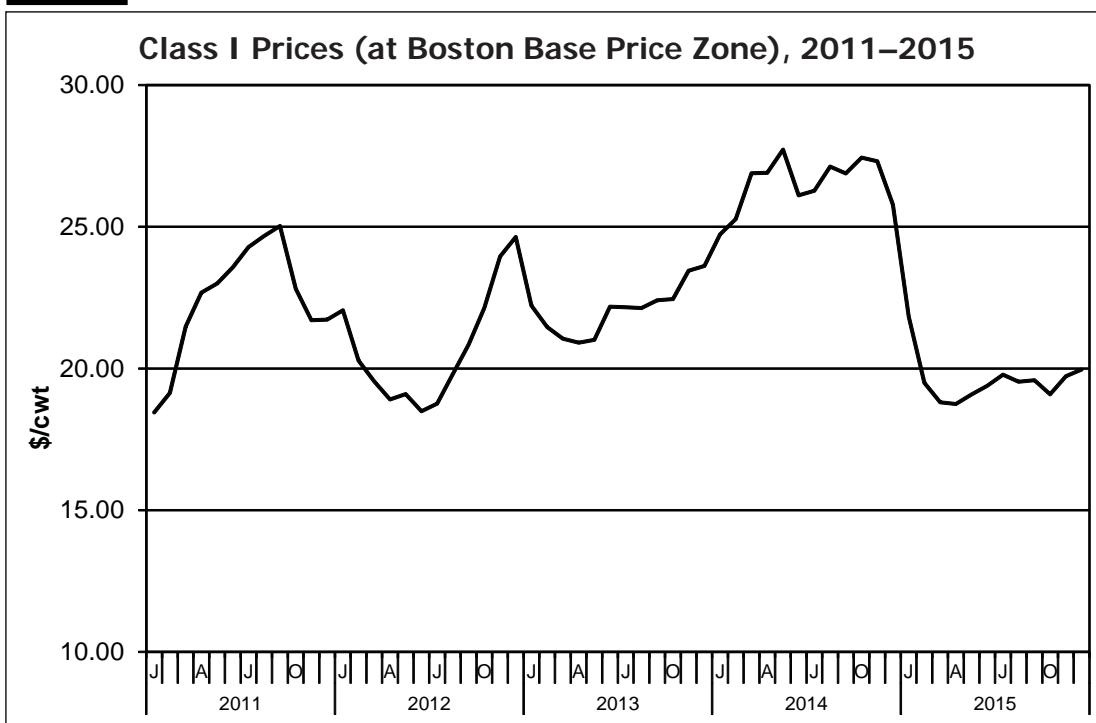

### **Producer Tests**

The annual average producer butterfat test equaled 3.78 percent in 2015, unchanged from the previous year, which was record-setting. The annual average producer protein test was 3.07 percent, down 0.01 point from 2014. The producer other solids test averaged 5.75 percent, up 0.02 points from the previous year.

\* Producer receipts data based on audited producer payroll reports of pooled producers. Totals may not add due to rounding.

\*\* Counties with fewer than 3 producers are restricted and have been consolidated into the "all other" category. Some counties had more than 3 producers, but had fewer than 3 handlers pooling milk during the month.

\*\*\* Represents restricted data for the states of Delaware, Indiana, Kentucky, Michigan, Missouri, New Jersey, Ohio, Rhode Island, West Virginia, and Wisconsin.

\* Producer receipts data based on audited producer payroll reports of pooled producers. Totals may not add due to rounding.

\*\* Counties with fewer than 3 producers are restricted and have been consolidated into the "all other" category. Some counties had more than 3 producers, but had fewer than 3 handlers pooling milk during the month.

\*\*\* Represents restricted data for the states of Delaware, Indiana, Kentucky, Michigan, Minnesota, Missouri, New Jersey, Ohio, Rhode Island, West Virginia, and Wisconsin.

## Bulletin Highlights — 2015

### **January**

A summary of the 2014 market service program was discussed. An overview of the calibration program and checks/calibration results was given. A chart illustrated tank checks and calibrations by tank size for 2014.

Class IV utilization in the Northeast Order increased 23.2 percent in 2014, from the previous year. The increase was 31.8 percent when compared to the average from the past 10 years (2004-2013). The increase in Class IV utilization's impact and the effect on the statistical uniform price were discussed. A chart illustrated changes in the Northeast Order class utilization for selected time periods.

A pool summary for all federal orders was given in a table for January–December, 2013 and 2014.

### **February**

The total U.S. milk production increased 2.4 percent in 2014, the highest rate since 2006. Milk production in the Northeast milkshed increased 1.7 percent in 2014, less than the U.S. average. Nationally, the number of milk cows increased a slight 0.4 percent, while average milk production per cow (MPC) grew 2.0 percent nationally. A table showed the top ten states ranked by milk production for 2014.

A market outlook for 2015 was forecasted. Factors of the production and price relationship, the role of exports, along with domestic demand and supply were discussed. A chart displayed actual and projected SUP and Class I prices at Boston, Massachusetts, for 2015.

The Northeast Market Administrator's office completed the process of compiling and distributing handler milk production records for eligible dairy farms intending to submit a claim under the Allen et al v. Dairy Farmers of America, et al. No. 5:09-cv-230-U.S. District Court for the District of Vermont class action case.

### **March**

The top ten counties in terms of milk pooled on the Northeast Order accounted for 33.6 percent of all milk pooled in 2014. Changes in rankings and the proportion of farms and daily deliveries per producer (DDP) in the Northeast counties were discussed. A table showed milk production, number of producers, and average daily deliveries per producer in the top ten counties pooling on the Northeast Order for 2014.

Northeast Order producer milk receipts for the first quarter of 2015 continued to be strong with the 3 month total volume up 2.1 percent compared to the same

period in 2014. Increases in production, utilization changes and the effect of prices were discussed. A table compared the Northeast Order pooled milk receipts for January–March, 2014 and 2015.

A pool summary for all federal orders was given in a table for January–March, 2014 and 2015.

### **April**

Approximately 55 million pounds of organic milk was pooled on the Northeast Order in December 2014, accounting for roughly 2.5 percent of the total pool. Organic producer counts and components were discussed. A chart illustrated organic and conventional average butterfat tests by milk types; along with tables showing the number of organic producers by state/area; annual average component tests by milk types; and daily average output of producer milk per farm for December, 2010 through 2014.

Total sales of fluid milk products in the Northeast Marketing Area continue to decline; the subset of organic milk has increased since the Order began collecting data in late 2005. A table compared organic sales by type of handler in the Northeast Marketing Area for 2010, 2013, and 2014.

### **May**

The USDA's National Agricultural Statistics Service released their *Dairy Products 2014 Summary*. Changes in national cheese production, other products and percent of total milk production, were compared to the Northeast Order. The leading cheese producing states were discussed. A table highlighted selected products' changes from 2013 and 2009, and a comparison of Northeast Order milk used in the manufacture of these products in 2014.

The SUP at the Boston, MA, zone averaged \$16.79 per cwt for January through May 2015. When the Chicago Mercantile Exchange's Class III and Class IV milk future prices were used, the SUP for 2015 projected to average \$17.35 per cwt. U.S. volume and value of exports along with other demand factors and the supply side were analyzed. A chart illustrated actual and projected Northeast Order uniform prices at the Boston, MA, zone from 2012 through 2015.

### **June**

Negative Producer Price Differentials (PPD) occurred in outer zones of the Northeast Order. The PPD for June 2015 equaled \$0.37 per cwt at Suffok

(Continued on following page)

## Bulletin Highlights — 2015 (*continued*)

County, Massachusetts (Boston), the basing point for the Northeast Order. An explanation of why producers would receive negative PPDs was given. Maps presented the volume of milk receiving negative PPDs and the differential zones impacted for March through June 2015.

A pool summary for all federal orders was given in a table for January–June, 2014 and 2015.

### **July**

Northeast Order total pooled milk receipts increased 0.8 percent in the first 6 months of 2015. Milk production in the 3 top contributing states in the Northeast (New York, Pennsylvania, and Vermont) rose 2.3 percent during the same period. National milk production was discussed. Northeast class utilization changes were compared. A map illustrated the year-to-year percent change in milk production for selected states from January through June 2015.

The DDP for all producers pooled on the Northeast Order increased by 62.8 percent since 2000. A chart displayed average DDP for selected Northeast states from June 2000 through 2015. A table showed DDP by Northeast state and the percent change since June 2000.

### **August**

The USDA, Agricultural Marketing Service, *National Dairy Product Sales Report* (NDPSR) prices that are used in federal order price formulas were analyzed and discussed. A chart showed monthly NDPSR prices from July 2010 through August 2015.

Sales of packaged fluid whole milk products in the Northeast Marketing Area during the first 6 months of 2015 grew 1.7 percent, in contrast to the overall sales of fluid milk products that declined 2.8 percent. Nationally the increase in whole milk sales was showing a similar trend. Possible causes and the effect on butterfat prices on the CME were discussed. A table displayed sales of fluid milk products from January through June, 2013 through 2015.

The USDA announced a public hearing to be held to consider the establishment of a Federal Milk Marketing Order for California.

### **September**

An overview of current market dynamics and performance of the butter market was given. Accompanying charts illustrated actual and projected Northeast Order SUP for 2015, at the Boston, MA, differential zone, and CME daily butter prices for 2014 and 2015.

For the third year in a row, the shipping percentage was reduced from 20 to 15 percent for the months of September, October, and November 2015.

The USDA received a request from the Organic Trade Association for a national hearing to amend all Federal Milk Marketing Orders (FMMO) regarding organic milk.

A pool summary for all federal orders was given in a table for January–September, 2014 and 2015.

### **October**

October Class I utilization in the Northeast by volume and percentage continued to hit a record low level. In-area sales, media reporting, and price response were discussed. Charts illustrated the volume and percentage of total pool for Class I utilization for the month of October, 2000 through 2015, and milk types as a percent of Northeast in-area sales.

The combination of recent high tests and butterfat prices resulted in a higher value of butterfat accounting for nearly 60 percent of the average producers' gross price in October 2015. A table showed the contribution of total gross payment received by producers for the month of October, 2000, 2005, 2010 and 2015.

USDA requested additional information from the hearing proponent on the proposed national hearing amending all FMMOs concerning how organic milk would be treated for pricing and pooling purposes under FMMOs.

### **November**

The Northeast Order uniform price was forecasted to average a little over \$17.00 per cwt in 2015. Demand and supply factors were analyzed for 2015 and forecasted for 2016. A chart illustrated actual and projected USDA's milk, corn, and diesel prices for 2009 through 2016.

A calendar showed the 2016 dates for partial payments to producers who are not members of cooperatives. The Order requirement was explained.

### **December**

Selected Northeast Order statistics for 2015 were summarized, and a table compared the Order's pool statistics for 2014 and 2015.

The proportion of pool volume, pooled producers, and DDP for the top 5 states in the Northeast Order in 2015 and 2005 were compared and discussed. A map highlighted the 2015 pool contributions of the 5 largest states in the Order.

## **USDA Equal Opportunity Policy**

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.
